

◆ High-Flex Flat Cable System ◆ Vacuum Version

Features

- Bending life exceeds 10 million cycles
- A greater variety of cable types and flexible combination methods
- Higher integration with a smaller bending radius
- High cleanliness movement with no particles
- No minimum order quantity restrictions

Features

- Bending life exceeds 10 million cycles
- A greater variety of cable types and flexible combination methods
- Higher integration with a smaller bending radius
- High cleanliness movement with no particles
- High vacuum applicability, low outgassing rate
- High pressure resistance up to 20KV
- No minimum order quantity restrictions

Applications

High-flex flat cable system – main applications include semiconductor front-end wafer inspection equipment, semiconductor inspection equipment suitable for vacuum environments, photolithography equipment systems, high-precision visual inspection, and medical devices.

Technical Specifications

	Data	Unit
Max. acceleration	4	g
Max. velocity	2	m/s
Min. bend radius	40	mm
Operating temperature range	-40~80	°C
Lifetime	> 10 million	
Cleanliness class	IPA Clean Class 1 (ISO14644-1)	
Certifications	UL, IPA	
Min. spacing	1	mm

Dust-Free POD Drag Chain

Features

- Highly durable outer layer with a resistance of millions of reciprocating cycles
- Cleanliness level of ISO Class 100, effectively protecting cables and reducing cable powder
- Wide range of application
- Customizable for different POD widths, meeting customer customization requirements

Applications

POD – laser equipment, new energy battery inspection equipment, high-precision flaw detection equipment, semiconductor back-end chip inspection equipment, high-end lens assembly equipment for lenses, semiconductor packaging equipment, liquid crystal panel-related equipment, and robotics.

Interface Definition

Customization Information

Model list as shown below:

	Model		Model
	46-4C18-00-00 Flat flex--4×0.75		46-1P26-00-00 26#1P+Filler+PTFE no Jacket
	46-4P26-00-00 Flat flex--4×2×0.14		S-23032401 0.25mm2/1C+S+PTFE
	46-6P26-00-00 Flat flex--6×2×0.14		47-5C26-00-00 72/0.05±0.008mm
	46-6C22-00-00 Flat flex--6*0.3		46-4C21-00-00 100/0.08±0.008mm
	46-8C21-00-00 Flat flex--8*0.3		47-4C20-00-00 150/0.08±0.008mm
	46-AC27-00-00 Flat flex--10*0.1		47-8P26-00-00 28/0.08±0.008mm
